Moody's Investors Service, Inc., a wholly-owned credit rating agency subsidiary of Moody's Corporation ("MCO"), hereby discloses that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by Moody's Investors Service, Inc. have, prior to assignment of any rating, agreed to pay to Moody's Investors Service, Inc. for appraisal and rating services rendered by it fees ranging from \$1,500 to approximately \$2,500,000. MCO and MIS also maintain policies and procedures to address the independence of MIS's ratings and rating processes. Information regarding certain affiliations that may exist between directors of MCO and rated entities, and between entities who hold ratings from MIS and have also publicly reported to the SEC an ownership interest in MCO of more than 5%, is posted annually at [www.moody's.com](http://www.moody's.com) under the heading "Investor Relations — Corporate Governance — Director and Shareholder Affiliation Policy."

Additional terms for Australia only: Any publication into Australia of this document is pursuant to the Australian Financial Services License of MOODY'S affiliate, Moody's Investors Service Pty Limited ABN 61 003 399 657 AFSL 336969 and/or Moody's Analytics Australia Pty Ltd ABN 94 105 136 972 AFSL 383569 (as applicable). This document is intended to be provided only to "wholesale clients" within the meaning of section 761G of the Corporations Act 2001. By continuing to access this document from within Australia, you represent to MOODY'S that you are, or are accessing the document as a representative of, a "wholesale client" and that neither you nor the entity you represent will directly or indirectly disseminate this document or its contents to "retail clients" within the meaning of section 761G of the Corporations Act 2001. MOODY'S credit rating is an opinion as to the creditworthiness of a debt obligation of the issuer, not on the equity securities of the issuer or any form of security that is available to retail investors. It would be reckless and inappropriate for retail investors to use MOODY'S credit ratings or publications when making an investment decision. If in doubt you should contact your financial or other professional adviser.

Additional terms for Japan only: Moody's Japan K.K. ("MJKK") is a wholly-owned credit rating agency subsidiary of Moody's Group Japan G.K., which is wholly-owned by Moody's Overseas Holdings Inc., a wholly-owned subsidiary of MCO. Moody's SF Japan K.K. ("MSFJ") is a wholly-owned credit rating agency subsidiary of MJKK. MSFJ is not a Nationally Recognized Statistical Rating Organization ("NRSRO"). Therefore, credit ratings assigned by MSFJ are Non-NRSRO Credit Ratings. Non-NRSRO Credit Ratings are assigned by an entity that is not a NRSRO and, consequently, the rated obligation will not qualify for certain types of treatment under U.S. laws. MJKK and MSFJ are credit rating agencies registered with the Japan Financial Services Agency and their registration numbers are FSA Commissioner (Ratings) No. 2 and 3 respectively. MJKK or MSFJ (as applicable) hereby disclose that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by MJKK or MSFJ (as applicable) have, prior to assignment of any rating, agreed to pay to MJKK or MSFJ (as applicable) for appraisal and rating services rendered by it fees ranging from JPY200,000 to approximately JPY350,000,000. MJKK and MSFJ also maintain policies and procedures to address Japanese regulatory requirements.

# 1 Assumptions

1. Context ID, Process setting name and Deal (and optional security and supporting data) will be passed as input
2. Account Set not applicable, all behaviors come from scenario
3. Multiple deals will be sent in one JSON

## 2 Webservice call

Through Webservice: <http://jayachar-7w1:8088/rco/service/runanalysis/realtime/ecl>

From Testharness: -type runAnalysis -eclInputJsonFile "<input Json file>"

Example: -type runAnalysis -eclInputJsonFile "C:\\dev\\realtimeEcl\\ECL\_REAL\_TIME\_DEAL\_1\_fixed.json"

## 3 Request/Response information for the webservice call

UI is expected to send these input parameters

1. Deal and deal related information will be in JSON format and each deal will have context and process setting information in it.
2. Security for the instrument (REPO/REV\_REPO/SECURITY\_POSITIONS) will be provided in the JSON. Refer Security.Json for the format. Security Reference in the instrument JSON should match the security reference of the BOND
3. Supporting Data (Interest Rate, Exchange Rate, Import CF, Stages, Rating, Collateral) will be provided in the JSON (Refer table below).
  - a. Interest Rate and Exchange Rate data will default to the input set from Scenario if its not provided in the JSON.
  - b. Import CF, Stages, Rating, Collateral Has to be provided in the JSON. Will not default to the tables.
4. All the information (Instrument, Interest Rate, Exchange Rate, Import CF, Stages, Rating, Collateral) have to be in one JSON. See Attached:

5. Response JSON format

6. Break down of all the JSON information is below

## 5 Real Time ECL Analysis Workflow

1. New classes are marked in green.
2. Run in parallel with other analysis (do not store any information on DB so the analysis wont crash when running in parallel)
3. Will be run like test harness without submitting to Spark.
4. Wrappers will be used instead of Builders so the tasks will not be distributed.
5. ExecutableTest class will be called through command line from the webservice call.
